1 PURPOSE OF THE ACTIVITY

The purpose of this activity is to ensure timely and accurate vendor payments by processing incoming invoices through Basware and Oracle Fusion, with manual interventions by the Accounts Payable (AP) team when necessary

Expected output and/or deliverables

Invoice Submission Vendors send invoices via email to the designated accounts payable in the inbox.

Basware Capture & Indexing Invoices are routed into Basware, where initial data capture and indexing occurs.

Exception Handling If Basware identifies discrepancies or incomplete data, the AP team intervenes to correct and manually index the invoices.

System Interface Once corrected, the invoices are passed to Oracle Fusion through system integration.

Payment Initiation Oracle Fusion initiates the payment process, ensuring vendors are paid on time.

1.1.1 Invoice processing	Performed by Cognizant	Approved by SFL	Step included in the SOP?
Process invoices (e.g., data validation, Perform PO Match, post invoice / credit to ERP, block / document exception, return to Cognizant etc.), including electronic images.	X		Yes
Post invoices	X		Yes

2 AUDIENCE

This Standard Operating Procedure (SOP) is designed to provide clear and detailed instructions for all individuals involved in the specified processes. The primary audience

includes employees who directly execute the tasks, supervisors and managers who oversee operations. Additionally, internal and external auditors and regulatory bodies may reference this SOP to verify adherence of the implemented process. By outlining these procedures, the SOP aims consistency, accuracy, and compliance across all levels of the organization.

- **Direct Users:**

- **GBS active processors:** GBS processors who perform the tasks outlined in section 8. Standard Operating Procedure, to rely on these procedures to ensure consistency and accuracy in their work.
- **GBS new hires** During training phase, associates can find the document as a supporting document for better understanding of the process.

- **Indirect Users:**

- .1 **Auditors and Inspectors:** Auditors may examine SOPs to verify compliance with the implemented processes.
- .2 **Finance staff in Safelite and Belron:** Management could evaluate the design of the process as supported in this document. Further, the change management process would be based and updated in this SOP.

3 SCOPE

This SOP defines the end-to-end process for managing invoice transfers from **Basware** to **Oracle Fusion** within **Safelite's** financial ecosystem. The goal is to ensure: Timely payments, Accurate data capture, Compliance with accounting standards and Efficient processing of invoices in the Transfer queue

Company/Entity code	System	Impacted
2000 – Safelite US 2010 – Safelite US	Oracle Fusion	Posting of the non-po invoices against company code 2000 & 2010

4 PROCESS DEPENDENCIES:

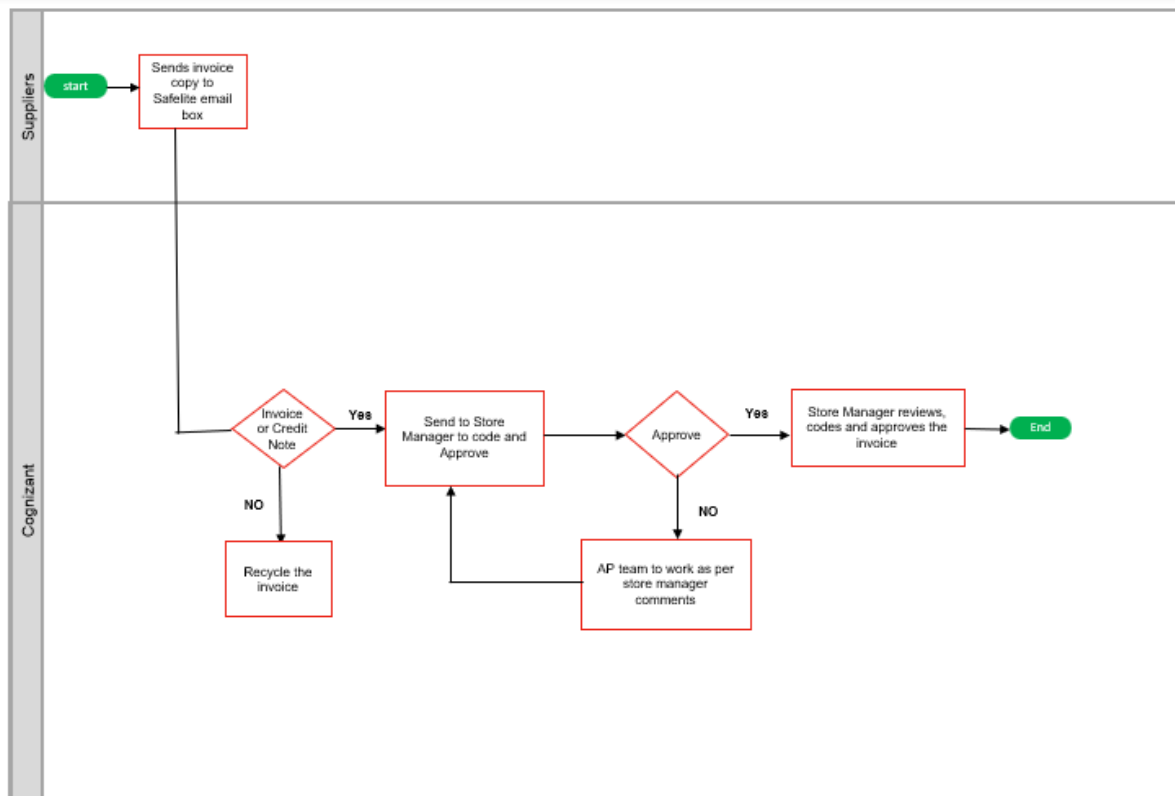

Invoice Queue Dependency – Vendor Code Validation

- **Issue:** Invalid queue invoices due to mismatched or missing vendor codes.
- **Action Required:**
 - Identify the correct **vendor code** in both **EBS** and **Fusion** systems.
 - Cross-reference with the invoice received in **Basware** to ensure alignment.
- **Goal:** Ensure accurate vendor mapping to avoid processing delays or errors.

5 SYSTEMS, APPLICATIONS AND TOOLS USED

System/Application/Tool	Functionality	Access Link

Vendor	Invoice	Processing invoices in Basware	Invoice ready for payment in fusion	Vendor

8 STANDARD OPERATING PROCEDURES

1. Introduction to Basware	
1. Basware as a capability of AI/ML (Machine Learning). It auto captures the mandatory field with the help of the Machine learning program. 2. It also helps to eliminate the Backlog/Increase the Visibility. 3. Over a period, it rectifies the mistakes and auto captures data by itself. 4. Basware helps us to automate the process. 5. Basware helps to achieve a new level of efficiency and reduce errors. 6. Basware will replace the Kofax/Mark view.	
1.1 Invoice Lifecycle in Basware	
1. Invoice Investigation & Data Capture: - A supplier sends the invoice to generic mailbox (invoice@safelite.com) via email in pdf format. Once the invoice is received in Basware, it runs the automated rules and priorities to capture data and create the electronic invoice. 2. Invoice processing: - Once invoice received in Basware, it will auto-capture the data, if all details are correct then it matches with PO and receipt / if any mandatory fields are not captured AP team will update the details manually. If it is a non-po invoice AP team will review and send the invoices to respective approvers. 3. Payment & Post Payment: - Invoices will move through an approval process, once invoices are approved by the respective approvers, the invoices will move to transfer queue to get interfaced with oracle. Finally, it moves through the payment life cycle. 4. Basware is a workflow tool, if any intervention required from business or supplier that will be modified in Basware, once invoices cleared in Basware payment & accounting will happen in fusion.	

Invoice Lifecycle

1. INVOICE INGESTION & DATA CAPTURE				2. INVOICE PROCESSING				3. PAYMENT AND POST PAYMENT		
Invoice reception	Invoice scanning	Data Capture (Paper & PDF)	Electronic Invoice	Non-PO processing	PO Matching (inc. EDI)	Exception Handling	Check Requesting	Accounting	Archiving	Payment
BASWARE	LOCAL SOLUTION	BASWARE		BASWARE				ORACLE FUSION	BASWARE	ORACLE FUSION

1 Company Confidential

1.2 Basware Login

Follow the below steps to login to Basware.

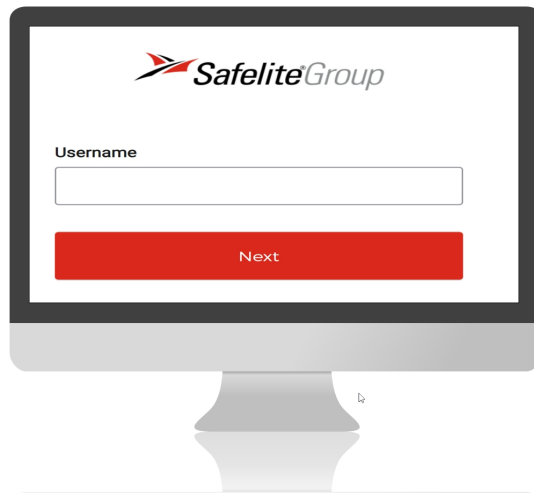

Sign into okta dashboard at idp.mysafelite.net with your credentials.

Log In

STEP 1

Sign into your Okta Dashboard at idp.mysafelite.net

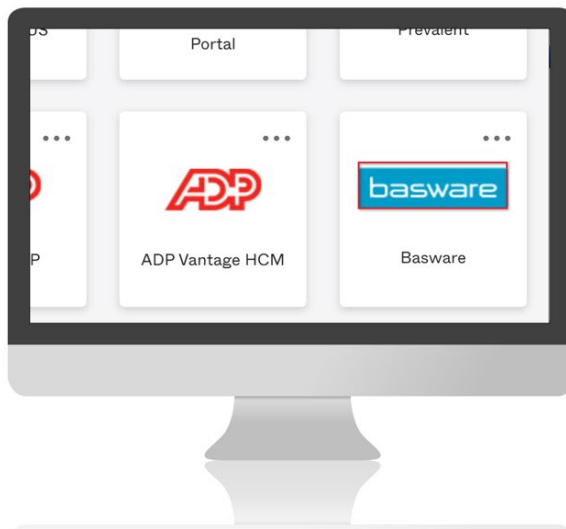

1.3 Basware Login

Click on “Basware Tile”

Log In

STEP 2
Click the **Basware** tile.

1.5 Basware Login

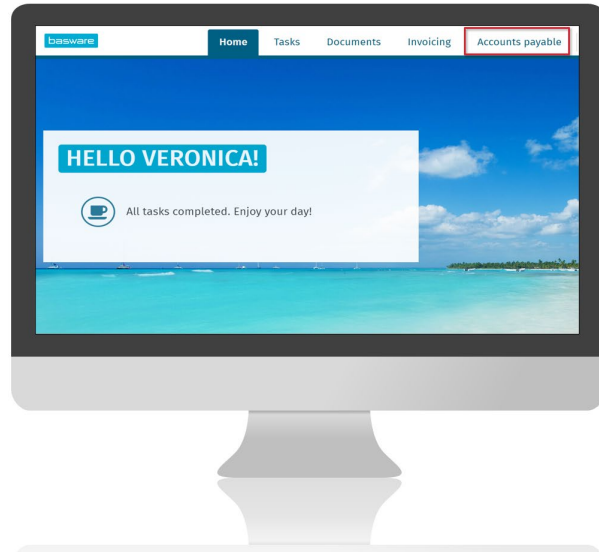

Click on “Basware P2P”; Basware homepage will appear.

Log In

Step 4

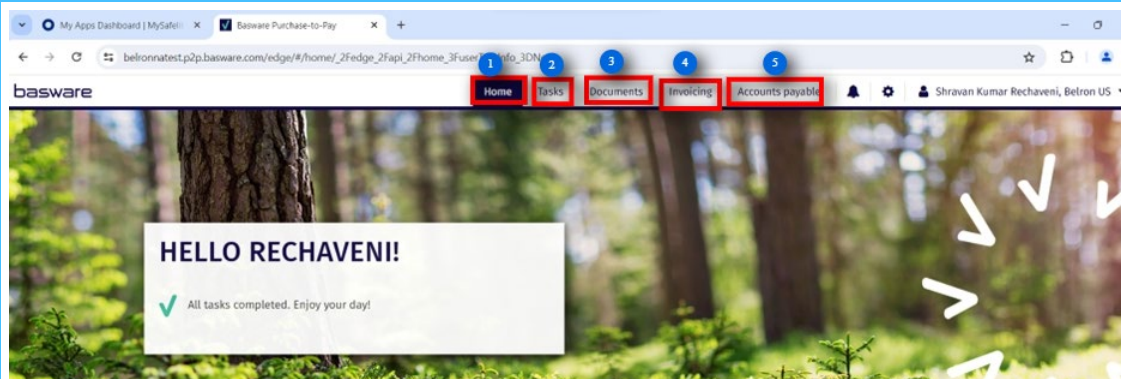

From the Basware P2P homepage, click
Accounts Payable.

2. Basware homepage overview

2.1 Basware homepage tabs

1. **Home:** - Home tab, which will bring you to the Basware home page.
2. **Tasks:** -The Tasks tab serves similar functions as the notification or bell icon in Oracle fusion, all your assigned tasks (invoice approvals) will appear in this tab.
3. **Documents:** -The documents tab allows users to search for processed invoices. AP team will use Accounts Payable, but an inquiry-only user can search the documents by using this tab.
4. **Invoicing:** -The invoicing tab used to Create the check requests and debit memos.
5. **Accounts payable:** -The Accounts payable tab holds the AP functions, including the various queues. This tab intended for Accounts payable team to perform their AP related activities.

3 Accounts Payable layout in Basware

1. **Invoice Queues:** - Once the vendor sends the Invoices to generic email box will appear in one of these four queues.
2. **Search And Adjust View:** - Search tab option is used to find specific invoices. Example, search invoices by status or Date range. Use advanced search option to shorten the search list. We can also adjust the view to how we can see the invoice information and coding information in the view pane.
3. **View And Action Pane:** - This will display the View set-up which you have selected. We can view Full coding and Half coding layout using this option.

Home Screen Layout

The screenshot displays the Basware Accounts Payable interface. On the left, three callout boxes with red lines pointing to specific areas are labeled:

- 1 Invoice Queues:** Points to the top dashboard section showing various invoice status counts (e.g., 2.5k RECEIVED, 33 MATCHING, 19 WORKFLOW, 57 TRANSFER).
- 2 Search and Adjust View:** Points to the search bar and filters at the top of the main table area.
- 3 View and Action Pane:** Points to the right-hand side of the interface, which includes tabs for Workflow, Attachments, Images, and Invoice lines, along with a coding section.

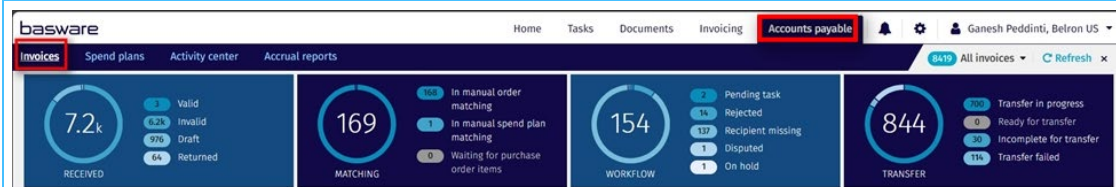

The main interface shows a table of invoices with columns for Notice, Creation Time, AP clerk, and P. The table lists several invoices from Johnson K Kaleisha. The right-hand pane shows the 'Images' tab with a message 'No images yet. Add image' and the 'Coding' tab with a message 'No coding rows yet. Add first coding row'.

4. Accounts Payable Overview

The Accounts payable tab holds activities of AP functions, including the various queues. This tab is intended for Accounts payable team to perform their AP related activities.

In Accounts payable tab we have four queues.

1. Received queue.
2. Matching queue
3. Workflow queue
4. Transfer queue

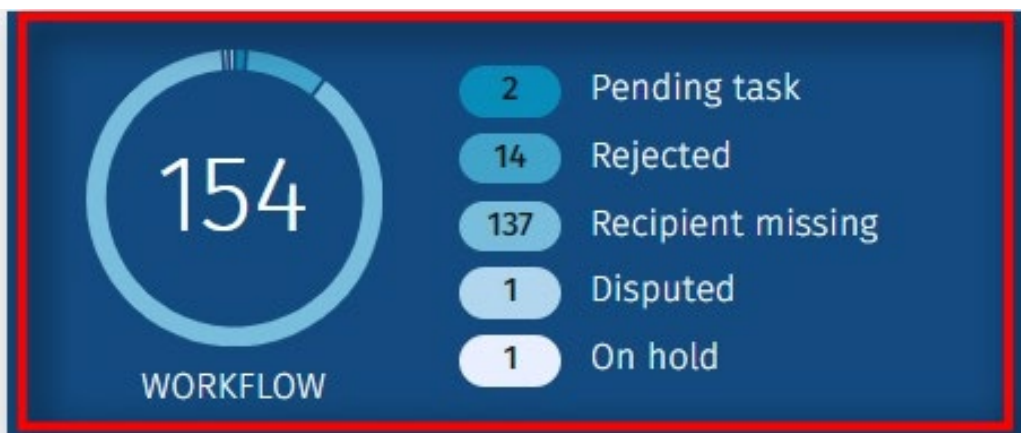

5.1 Workflow Queue

All the non-PO invoices will appear here, especially invoices that require approval, are disputed, or are on hold.

In Workflow queue we have five sub queues.

1. Pending Task queue – Invoices are pending with approver.
2. Rejected queue – Invoices rejected by approver will sit in this queue.
3. Recipient Missing queue – Invoice doesn't have appropriate approver and non-po invoices.
4. Disputed queue – All the invoices disputed will appear in this queue.
5. On hold queue – All Hold invoices placed on hold by approver will appear in this queue.

5.2 Pending task queue

In this queue the invoices which are pending for manager's coding and approval those invoices will stay in this queue. Once the invoice is coded and approved by manager, then the invoice will move to transfer queue. Invoices would wait for 10days, if no action taken by the approver, automatically it will be escalated and moved to their supervisor. We will work on this queue to move old items to the appropriate approver.

5.3 Rejected Queue

If approver rejects the invoice in such cases the invoices will fall under this Queue.

Click on Rejected tab.

5.3.1 Follow the below steps to process “Rejected Queue” invoices

1. Click on the “Rejected” queue.
2. Select the invoice from the left side of the queue

The screenshot shows the basware web application interface. The top navigation bar includes 'Home', 'Tasks', 'Documents', 'Invoicing', and 'Accounts payable'. The main dashboard displays several metrics: RECEIVED (7.3k), MATCHING (388), WORKFLOW (232), and TRANSFER (826). The 'Rejected' queue is highlighted in the workflow section.

Below the dashboard, the 'Rejected' queue is expanded, showing a list of invoices. The first invoice is selected, and its details are displayed on the right. The invoice is for 'WURTH USA INC 1404475' with a gross amount of 80.40 USD. The 'Exception reason' is 'Credit memo needed'. The 'History' tab shows a list of actions performed on the invoice, including 'Validation succeeded', 'Automatic Coding task created', 'Automatic invoice coding failed', 'Approval task created', 'Invoice unassigned from Johnson K Kaleisha because no rule was found', 'Task forwarded to AliAkbar Syed: "Please code and approve"', and 'Rejected: Credit memo needed. "Testing" View changes'.

5.3.2 Rejected Queue

1. Based on selected invoice, invoice will be opened, check all the mandatory details (Ex: Supplier name & supplier site, invoice number & invoice date, invoice gross/net amount, payment term, PO number etc.) as per the invoice copy.
2. Click on "history" tab check the entire history of the invoice.
3. We can view the reason why invoice got rejected.
4. We will take necessary action as per the rejected comments.

For example: Routing the invoice to another store manager or requesting for credit memo etc....

The screenshot displays the Basware Accounts Payable interface. The top navigation bar includes 'Home', 'Tasks', 'Documents', 'Invoicing', and 'Accounts payable'. The 'Accounts payable' section is active, showing a dashboard with four circular metrics: 7.3k RECEIVED, 388 MATCHING, 232 WORKFLOW, and 826 TRANSFER. Below the dashboard, the 'Rejected' tab is selected, showing a list of rejection reasons. A red box highlights the 'Rejected, Coding difference' reason, and another red box highlights the 'History' tab. A third red box highlights the 'Rejected: Credit memo needed. 'Testing' View changes' comment by AliAkbar Syed.

5.4 Recipient Missing Queue

When we take appropriate action in “invalid queue” invoices will move to next queue, if any invoice does not have PO, those invoices will move to recipient missing queue.

AP Team will send the invoice to respective approver (store/district manager) for coding and approving the invoice after doing investigation with the available information on the invoice.

5.4.1 Follow the below steps to process 'Recipient Missing' Queue

1. Click on the "Recipient Missing"
2. Select the invoice from the queue.

The screenshot shows the basware Accounts payable interface. The top navigation bar includes Home, Tasks, Documents, Invoicing, and Accounts payable. The main dashboard displays several metrics: RECEIVED (7.3k), MATCHING (388), WORKFLOW (230), and TRANSFER (826). The WORKFLOW section shows a 'Recipient missing' status with a count of 131. A red box highlights this status. Below the dashboard, the 'Recipient missing' queue is displayed. A red box highlights the 'Recipient missing' status in the 'Coding' dropdown menu. A blue circle with the number '2' is placed over the 'Recipient missing' status in the dropdown menu.

Organization	Creation date	Supplier Name	Invoice Number	Amount	Status
Belron US	MM/DD/YYYY	Supplier Name	131840	1,445.78 USD GROSS	Recipient missing

5.4.6 Recipient missing queue – Non-PO Invoice (Routing rules)

Once the invoice is opened from recipient missing queue update the mandatory fields and route the invoice to the store manager/district Manager for coding and approval.

Follow the below steps to route the invoice.

1. As per ship to address search the location manager in location sheet and route for coding and approval.
2. If ship to address is not available on invoice copy, route the invoice as per the bill to address.
3. If ship to address and bill to address are corporate address (Columbus) than route as per vendor nearest location address. (this is not correct) (We will look at history or type of service to locate the correct Corporate contact to approve or use the special routing sheet for other scenarios)
4. Verify routing with Oracle EBS, if needed.

Note: - On the invoice copy if we have attention name route the invoice to respective person.

The screenshot displays the Oracle EBS Invoices interface for invoice QUENCH USA INC 1300929. The 'Header data' tab is active, showing various fields for invoice details. The 'Ship To Zip' field is highlighted with a red box, indicating it is a mandatory field for routing. The interface includes sections for 'Images', 'Discussions', 'Header data', 'Related documents', 'Workflow', 'Attachments', 'Invoice lines', and 'History'. The 'Header data' section contains fields for Freight, Due date, Cash date, Cash sum, Purchase order numbers, Captured PO Number, Scan Date, Scan Report Code, Scan Report Comment, Voucher date, Check Request Approver, Overnight Code, Submitter, Potential Spend Plan Reference, Pre-Approved, Ship To Zip, Payment date, Scan Service Id, Creation time, Payment Currency, and Cost Center for Overnight charges. The 'Ship To Zip' field is currently empty, and the 'Payment date' is 9/23/2024. The 'Payment Currency' is set to USD. The 'Cost Center for Overnight charges' is also empty. The 'Pre-Approved' checkbox is unchecked. The 'Potential Spend Plan Reference' is D364723. The 'Overnight Code' is Select. The 'Voucher date' is 6/29/2024. The 'Check Request Approver' is Select. The 'Submitter' is Select. The 'Due date' is 6/29/2024. The 'Cash date' is 6/29/2024. The 'Cash sum' is 0.00. The 'Purchase order numbers' are empty. The 'Captured PO Number' is empty. The 'Scan Date' is 9/23/2024. The 'Scan Report Code' is empty. The 'Scan Report Comment' is empty. The 'Voucher date' is 6/29/2024. The 'Check Request Approver' is Select. The 'Overnight Code' is Select. The 'Potential Spend Plan Reference' is D364723. The 'Pre-Approved' checkbox is unchecked. The 'Ship To Zip' field is highlighted with a red box. The 'Payment date' is 9/23/2024. The 'Payment Currency' is set to USD. The 'Cost Center for Overnight charges' is also empty.

5.4.7 Recipient missing queue -Routing

If there is any attention name (like store manager name or any other approver name) route the invoice as per the attention name.

5.6.0 Dispute the invoice

If we received Credit memo and original invoice is not available in Basware and EBS (Prior to Sep 2024). We will dispute the invoice (Be sure to also check by supplier name or number & dollar amount for the original).

Before disputing the invoice, we must search for the original invoice for the credit memo and follow these steps below to search for the original invoice.

1. Click on Advance search
2. Click on Creation date: select last 12 months period
3. Invoice number: enter the Invoice number
4. Show all statuses: click the box
5. if we want more features, we can also use the Add criteria tab. we can search as per invoice amount/invoice type etc.
6. Click on search

Note: If we are unable to find the original invoice in EBS and Basware we will send an email to the vendor for original invoice copy against the credit memo.

The screenshot shows the 'Advanced search' modal in the Basware system. The search criteria are as follows:

- Organization:** Belron US
- Creation date:** 1/30/2024 - 1/30/2025
- Supplier Code:** 875274
- Status:** 38 statuses
- Show all statuses:** ☒
- Add criteria:** ☒ (highlighted with a red box)
- Buttons:** Add criteria, Reset search, Save, View saved searches, Cancel, Search

5.6.2 Follow the below steps to dispute the invoice

Click on drop down.
Click on “Dispute” option

The screenshot displays the Basware Accounts Payable web application. At the top, there's a navigation bar with tabs for Invoices, Spend plans, Activity center, and Accrual reports. Below this is a dashboard with four circular gauges representing different stages: RECEIVED (7.3k), MATCHING (388), WORKFLOW (233), and TRANSFER (826). Each gauge has a breakdown of counts for various statuses. Below the dashboard is a search bar and a table of rejected invoices. The table has columns for Exception reason, AP clerk, and Discussions. The first row is highlighted with a red box and a blue circle with the number 1. A dropdown menu is open for this row, showing options like 'Dispute', 'Save as PDF', and 'Add comment'. A blue circle with the number 3 highlights the 'Dispute' option. Another blue circle with the number 2 highlights the 'Open' button in the top right corner of the table.

Click on “Dispute” (After these steps invoice will move to Disputed Queue)

5.6.4 Disputed Queue

If we are disputing any invoice those invoices will appear in Disputed queue.

5.6.5 Disputed Queue

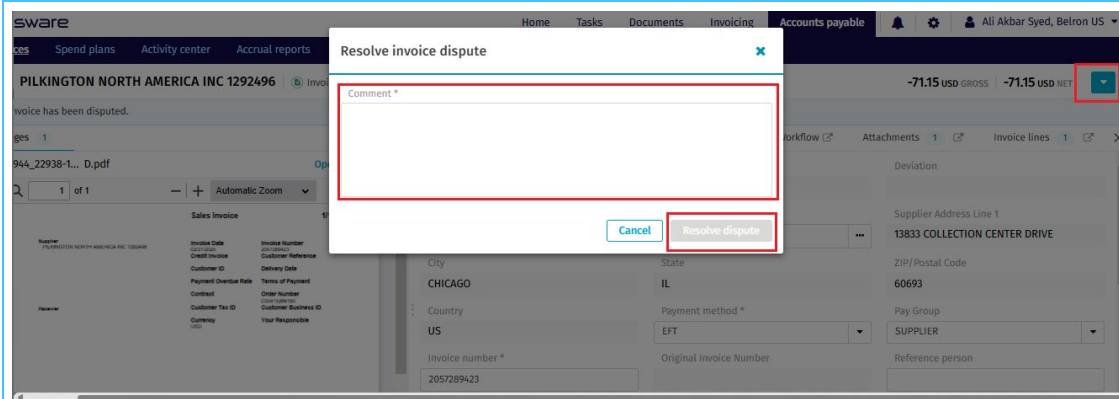

When the user works in a disputed queue, the AP team will cross-check whether original invoices are available in EBS & Basware. Once we click on the disputed queue, invoices will appear, Search for the original invoice, if we have the original invoice click on the drop down and click on resolve dispute (If required, attach the supporting document in attachment tab as a supporting documents).

The screenshot displays the Basware Accounts Payable interface. At the top, there's a navigation bar with tabs for Home, Tasks, Documents, Invoicing, and Accounts payable. Below this is a dashboard with four circular gauges representing different stages of the invoice process: RECEIVED (7.3k), MATCHING (388), WORKFLOW (233), and TRANSFER (826). Each gauge has a breakdown of sub-statuses. Below the dashboard is a search bar and a list of invoices. One invoice, 'CINTAS CORPORATION 1078695', is selected. The 'Attachments' tab is active, showing a list of attachments. One attachment, 'Credit Memo.eml', is highlighted. A context menu is open over this attachment, showing options like 'Remove', 'Mark as confidential', 'Resolve dispute', 'Save as PDF', and 'Add comment'. The 'Resolve dispute' option is highlighted in red.

5.6.6 Disputed Queue

If original invoice is posted or available, we will click down arrow button select resolve dispute and the below pop-up will appear.

Update the Comments and click on Resolve Dispute.

5.6.7 Disputed Queue

Once we completed Resolve Dispute, Credit memo will appear again in recipient missing queue, then we will forward the Credit memo to approver, for coding & approval.

Once the Credit memo is approved it will move to Transfer in Progress queue for payment in Fusion.

The screenshot displays the Basware Accounts Payable interface. At the top, there's a navigation bar with 'Accounts payable' selected. Below it, a dashboard shows four key metrics: RECEIVED (7.3k), MATCHING (388), WORKFLOW (233), and TRANSFER (826). The main content area is titled 'CINTAS CORPORATION 1078695' and shows invoice details. A 'Forward' button is highlighted in the top right of the invoice details section. The interface also includes a 'Coding' section at the bottom with a filter and various sum difference calculations.

5.7 On hold Queue

All the invoices which are placed by Approver on hold, those invoices will appear in this queue.

6 Credit memo process in Basware

If we receive any credit memo in Basware: check if original invoice has been received, if not processed, Process the Original invoice and credit memo both under POD-3 if PO is not available, and send to the store manager for approval.

1 Update the header data

2 update the description as pod3 (using full POD description details)

3 Update payment term code as Immediate

4 Update the amount in negative value.

7 Credit memo – Original Invoice Match with PO

If Original invoice matched with PO in Basware, we must match the Credit memo with PO. Following is the mandatory details we need to change in header data.

- 1 Check all the mandatory details.
- 2 Invoice type should be 'as Credit memo'
- 3 Credit memo number should end with 'CM' or as per the credit memo copy.
- 4 Terms should be 'Immediate'
- 5 Amount should be in 'negative value'.
